Subject: free to innovate

Microsoft has inhibited the growth of a very wide range of companies for many years. ONLY the government has the power to protect all of our other software and hardware providers. Clear and accurate evidence was presented, and Microsoft was found guilty. Since when and where do those found guilty get to decide their own punishment? The states that have held out from the settlement are acting on behalf of the citizen and consumer. They need to be respected and heeded. Break the monopoly and let those who truly innovate be free from unfair business practices.
